Project Name	LAPTOP REQUEST CATALOG ITEM
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

For the **“Laptop Request Catalog Item”** project, our **Brainstorming and Idea Prioritization** phase will focus on transforming the current manual and delay-prone laptop request process into a fast, efficient, and dynamic **ServiceNow Service Catalog** experience. We will collaboratively generate a wide range of ideas covering variables, dynamic UI policies, approval workflows, and user guidance—initially prioritizing quantity over quality to ensure every potential enhancement is captured for better data accuracy and an intuitive user interface. This will include exploring optimal ways to implement dynamic form behavior, clear instructions, and reset functionality. Following this, a structured prioritization process will help us evaluate and select the most impactful and feasible ideas for development, ensuring the final solution is user-centric, minimizes errors, and significantly improves both employee satisfaction and operational efficiency.

Step-1: Team Gathering, Collaboration and Select the Problem Statement-

Brainstorm & idea prioritization

Brainstorm ideas for a dynamic, user-friendly laptop request process in ServiceNow, even if the team is remote.

⌚ 10 minutes to prepare
🕒 1 hour to collaborate
👤 2-4 people recommended

Before we collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

⌚ 10 minutes

- Team gathering**
ServiceNow developer, IT support, UX designer, end-user
- Set the goal**
Making the laptop request form dynamic, easy to use, and error-free.
- Learn how to use the facilitation tools**
Keep discussion focused, encourage all ideas, and ensure everyone participates.

1 Define your problem statement

How to make laptop requests faster, easier, and error-free through a dynamic ServiceNow catalog item.

⌚ 5 minutes

PROBLEM

How might we create an intuitive laptop request form that guides users and reduces approval delays?

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

1 Define your problem statement

How to make laptop requests faster, easier, and error-free through a dynamic ServiceNow catalog item.

⌚ 5 minutes

PROBLEM

How might we create an intuitive laptop request form that guides users and reduces approval delays?

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

⌚ 10 minutes

Person 1

Role-based laptop recommendations

Person 2

Dynamic form fields

Person 3

One-click request templates

Person 4

Real-time approval tracking

TIP

You can select a sticky note and "pin" it to the board to make it easy to scan down!

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

⌚ 20 minutes

TIP

Add a collaborative sticky note to make notes, ideas, questions, and suggestions. Record decisions directly within your ideas.

Pre-filled User Information

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes

TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H** key on the keyboard.
